Synthetic Turf - A Strong New Trend

Click to enlarge photos...

We are pleased to announce the availability of high quality synthetic turf products for your landscaping projects. These products are locally sourced and made specifically for our Pacific Northwest climate. They are available for general purpose lawn areas, golf greens, and special pet areas.

Some advantages of using synthetic turf are:

- Significant savings in watering costs
- No mowing
- No fertilizer or pesticides
- Pet-friendly and anti-microbial
- Permeable backing allowing for proper drainage

Just let us know if you want to consider Synthetic Turf as an alternative for any of your grass surfaces and we will arrange for you to speak with our expert **Chuck Rammell**.

If you are so inclined, you can [click here](#) to vote for Olympic Landscape in the 'Best Landscape Design Service' category (we were the recipient of this Showcase Magazine award in 2017).

You can also vote for your local favorites in other categories while you are there! It is very simple, with nothing to 'sign up' for or account to create! Thank you for your vote!

**Enjoy your Spring and
upcoming Summer days!**
